THE DRY GOODS TRADE.

The New York Times, of the 22d, gives the following very interesting statement concerning the dry goods trade:

The market for domestic goods has been quiet, but steady during the past week. The prices are low, and the raw material can now be purchased, combined with the fact that there is more cotton offering for Europe than at any time since before the late war commenced, has exerted a depressing effect on the goods market, and we have accordingly to note some concession on the part of holders of many descriptions. We do not mean to be understood that there is any general decline in prices, though certain articles can undoubtedly be had something under last week's quotations. This is especially the case with prints and the poorer makes of muslin. Stocks are light, but with only a moderate request, holders are more disposed to realize than they have been for some time past. Moreover some dealers, who are pretty well provided, manifest an inclination to give way even more than they have done, and they undoubtedly would were it not for others who express their determination to hold out. The fact that though cotton has now gone down to about 43c. for middling, manufacturers are not buying, has some effect; but this is nearly counterbalanced by the scarcity of labor in the manufacturing districts, which has the effect to materially curtail manufacturing. It is feared that a good deal of difficulty will be experienced in procuring a sufficient number of operatives; but the number has been materially augmented of late by the arrival home of many who volunteered for the war.

The Manchester market is reported by late arrivals to be dull, and lower than it was a few days ago. The quotations for last month. Yarns are now lower by 1d. @ 1d. 1/2 lb. in low counts and qualities, and 1d. @ 1d. 1/2 lb. in the finer counts and better classes. Gray printers, 20 yards, have declined 6d. @ 1s. 1/2 piece, according to class and weight; 9-5 malapollams have declined 6d. @ 9d. per piece, and 9-8 printers also about 6d. @ 9d. per piece; but they have been in steeper demand than most other goods, except T cloths, which are only 3d. @ 6d. per piece lower; and domestics, which have all along been freely purchased, remain without notable change. The heavier makes of 5-4 shirtings suitable for China have declined 1s. 3d. @ 1s. 6d. per piece during the month, but the lighter makes six pounds to seven pounds, more especially adapted to India, have given way in price more considerably, and are quoted 1s. @ 2s. lower. Figured and brocade shirtings have also fallen in value about 1s. 3d. @ 1s. 6d. per piece, and India mulls and jaccons about 3d. @ 4d. per piece. The decline of Cotton at Liverpool during the same period may roundly be stated at 4d. @ 1d. 1/2 lb. in American and Egyptian; 1/2 @ 1d. 1/2 lb. in Brazil, and 1/2 @ 1d. 1/2 lb. in East India descriptions, while from their scarcity Smyrna have advanced 3d. @ 1d. 1/2 lb. during the month, from which it will be seen that the fall in value has been considerably greater in America than in Europe.

Shirtings and sheetings must be written 1/2 @ 1c. lower, prices having fallen in sympathy with cotton. The demand is moderate at the reduction, and during the past day... The market at the close, however, was heavy, and prices were barely sustained.

Prints have been in demand, and most kinds command full prices, though there are some few exceptions. The market at the close, however, was heavy, and prices were barely sustained.

Reconstruction of a Commercial View.

The Philadelphia Age exhibits in a striking light the great importance to the whole country of the speedy reorganization of the Southern States, considered in its material aspect, commercially and financially; and it takes the best way of enforcing it by presenting the results of the late war, and character and amount of the products of the South previous to the late unhappy war. To meet the liabilities imposed upon the people by taxes, to liquidate the principal and pay the interest of the enormous war debt, it is absolutely necessary that the resources of the country at large should be developed and stimulated to their fullest extent, and it is only by an enlightened, generous and liberal policy that we can relieve the burden which is now weighing down the business, capital and energies of the North. Facts and figures prove how much the Southern States used to contribute to the national wealth, and how necessary they are to the restoration of our former prosperity. "It would be a short-sighted policy, indeed," says the Age, "to allow nearly one-half of the nation to become partially unproductive at this time, in order to try the experiment of carrying out a theory in politics and industrial economy of doubtful expediency at best, even if practicable. We cannot afford to gamble with the material prospects of the nation at this period to satisfy sectional fanaticism."

The total export value of the cotton crop of the United States was, in 1850, \$30,000,000; in 1854, \$64,000,000; in 1859, \$72,000,000; in 1860, \$128,000,000; in 1861, \$161,000,000; in 1862, \$232,000,000;
